# Profile

Acting as a UX/UI Designer with extensive experience in creating intuitive and attractive interfaces. I use methods such as Crazy 8 to generate quick and effective ideas, develop detailed wireframes and mockups with Figma, ensuring a clear visualization of the projects. In the Discovery process, I conduct research and create personas to deeply understand users. I have skills in HTML5, CSS and TypeScript, applied to transform designs into functional interfaces. In addition, I work on SaaS projects, optimizing the user experience in software as a service platforms.
